protel for iPad

The app for mobile hotel management

Your alternative working station – wherever you are

Don't let work tie you to your desk! „protel for iPad", the first hotel management system that can be used entirely on a mobile device. The native app for the Apple iPad provides all classic front desk functions at a finger-stroke. Hotels can even use iPads as "floating workstations" to cut demand peaks at the front desk.

protel for iPad is the first fully mobile hotel management system and the perfect solution for all who are aiming to exceed their guests' expectations in customer service.

Go wherever you like and take protel with you!

▼ Room plan: create reservations, edit room and guest information

▼ Room type plan: create reservations for several rooms or room types at the same time

▼ Retrieve rates and availability

▼ Guest profile search, create and edit guest profiles

▼ Active lists (arrival, departure, In-house, reservations)

▼ Reporting (hundreds of protel reports)

▼ Invoices and much more …

Touch me!

No keyboard, no mouse - protel for iPad allows you to manage your hotel with the touch of a finger.

The clearly structured layout makes working with protel on the iPad not only a fun experience for anyone, but also offers excellent usability even for inexperienced users.

protel for iPad is a native app for the Apple iPad. The app can be used with SQL-based hotel management systems by protel hotelsoftware (protel SPE or MPE). protel Web Services and a tablet connector license per iPad are required.
